

Health & Safety Training 2019

Working at Heights

Fall Protection Gear & Fall Clearance Calculations

Course Description:

This course will cover the basics through to advanced awareness of fall protection systems. The course will offer advanced level details on how to protect yourself and ensure a safe working environment for persons working under your supervision at height. We will cover basic fall protection gear (harnesses, lanyards, self-retracting systems & horizontal & vertical lifeline systems), proper donning & doffing, maintenance & inspection of gear. We include a section on advanced fall clearance calculations for various scenarios including various types of anchorage systems & limitations.

By taking this module students will be able to: identify fall hazards, select appropriate personal fall protection gear & monitor all future work at height in compliance with local Occupational Health & Safety standards & US Industry Standards. A Certificate of Completion will be awarded.

This course is taught by a Qualified Fall Protection Engineer (Level 1 & 2) who is a practitioner in the construction industry and a Certified Safety Professional (CSP) through the Board of Certified Safety Professionals (BCSP).

Duration:

SATURDAY JULY 27th 8AM to 12NOON:

4 hours (Includes Knowledge Review 0.75 Hour)

Recommended attendance:

Site Superintendents, Foremen, Safety Officers and Company Decision Makers who are responsible for work which is carried out at height and whose employees or colleagues wear personal fall arrest gear. Attendee should be proficient in basic math with the ability to run calculations on a scientific calculator. Recommended at least Texas Instrument TI-30XS or equivalent. Attendees are invited to bring their own harness & lanyard to the class. Demonstrations will form part of the training.

Early bird registration by June 1st of **\$280.00 KYD**

Cost: \$300.00 KYD

Last day to register Saturday 22nd June.
Special rate for Cayman Contractors Association members, contact us for details.

Health Hazards in Construction

Course Description:

This course will cover health hazards employees in the Building Construction, Demolition & Repair workplaces are exposed to. We will cover various types of controls which will assist in protecting yourself and those under your supervision from these health hazards. The types of hazards that will be covered include chemical, heat stress, noise, biological, ergonomic-related. At the end of the course, the student should be able to understand the potential hazards that could present in the workplace & design and implement an effective protective program for employees at risk of exposure and be compliant with local labour law.

A Certificate of Completion will be awarded.

This course is taught by a practitioner in the construction industry who is a Certified Safety Professional (CSP) through the Board of Certified Safety Professionals (BCSP) .

Duration:

SATURDAY JUNE 29th 10AM to 12NOON:

2 hours (Includes Knowledge Review 0.25 Hour)
